

Empower a Resilient Cybersecurity Team

Talent Assessment, Development, and Retention Portal

Solutions Overview

CyberKnights is a new cloud portal, and cost-effective solution, for matching employers with cybersecurity candidates, while aligning recruitment and development strategies to the NIST-NICE Framework. Matching talent and businesses by assessing knowledge and skills is just one part of the solution. Employers can take further action, by leveraging tools engineered to enhance employee engagement, through methods for upskilling, or reskilling.

Identify Skills Gaps, Recruit New Talent, Retain Employees.

Why CyberKnights?

The NICE Framework is the cornerstone of the portal. With the ability to identify skills gaps in your organization, create skills postings mapped to work roles, and engage in the career journeys of employees, employers will establish a strong foundation for their security team development and retention programs.

NIST-NICE Framework

Adopt a nationally recognized standard for workforce development, and establish a foundation for skills gap measurement and analysis.

Skills Gap Assessment

Define what your company requires, and see where it currently stands, aligned to the work roles and competencies of the NICE Framework.

Team Development

Find, recruit, and develop security team members, from a diverse talent pool of self-starters, students, interns, apprentices, and professionals.

Employee Incentivization

Establish ongoing employee engagement and skills development, through certification vendor options and career journey mapping.

Employer and Recruitment Portal Users

Join a growing cybersecurity community, where talented individuals and businesses unite!

Go to www.cyberknights.us/employers, click 'Schedule Demo' to learn more, and get registered.
